Follow all warnings and maintenance guidelines

The new **Brocuda Hydraulic Tool** from Broco Underwater can be used for grinding, polishing, drilling and cleaning in underwater applications with the use of a variety of wheels, brushes and other attachments.

Applications include construction, cleaning of ship hulls and propellers, underwater cutting, salvage, demolition, and welding preparation.

The Broco Brocuda Hydraulic Tool can be used with grinding wheels, hull scrubbing brushes, wire and nylon brushes and barnacle busters from a variety of manufacturers due to the standard sized spindle.
