

SMART BANDER

FROM **RANKIN**
AUTOMATION

Hardbanding Made Easier

Less Time, Lower Cost

The **SMARTBANDER** is Rankin Automation's less expensive, more cost effective hardbanding machine for the drilling industry. This upgraded unit costs far less than traditional, full-size hardbanding trailers and systems, while producing the same high quality, repeatable welds again and again. The compact, lightweight design saves time and money by reducing the movement of heavy drill pipe, travel and time away from the job site. It can be transported in the back of a pickup truck to sites where hardbanding support equipment is used.

The adjustable roller clamps accommodate 2 3/8" to 6" outer diameter pipe and tubing.

- Make repairs and bands in the field
- Transport to any job site or use in shop

- Ideal for oilfield services and inspection companies
- One year limited warranty with purchase

Hardbanding Made Easier

Less Time, Lower Cost

The **SMARTBANDER** is a compact, fully functional, stand-alone, portable hardbanding machine that delivers the same high quality, repeatable bands as traditional, full-size systems. The SMARTBANDER weighs less than 2,000 pounds and has a footprint of 42 x 72 inches.

- **Quick adjusting chuck to secure pipe**
- **Rotator and hydraulic lift system to position pipe**
- **Adjustable torch height**
- **Water cooled torch**
- **Safety clamshell**
- **Fume extraction system**
- **PLC touch screen**
- **Easy to use intuitive program interface**
- **Easy to transport skid base**

Accessories available for purchase include welding power supply, air compressor, preheaters, cooling cans and additional jack stands. Turnkey systems are also available.

Rankin Hardfacing RanoBand 5 wire is available in 25 pound spools.

In addition to the **SMARTBANDER** Rankin Automation manufactures hardbanding skid mount shop systems, and full and mid-size trailer systems.
