

BROCO[®]

Industrial Maintenance and Repair Tools

BROCO[®] INDUSTRIAL PC/A-20 TORCH KIT

Exothermic Cutting System

Portable, Powerful Performance

**THE WORLD
RENOWNED
BROCO TORCH**

**PC/A-20 TORCH KIT
INCLUDES:**

- Broco[®] Industrial Torch
- Oxygen hose and power cable
- Striker plate assembly
- Safety mask
- Welding gloves
- Sample of longer-burning Prime-Cut 1/4" rods
- Sample pack of 3/8"x18" Prime-Cut rods
- Collets: 3/16", 1/4", 3/8", 1/2"

Portable Problem Solvers

Broco[®] Industrial Maintenance and Repair Tools are portable and powerful. Repair heavy equipment at the construction site, clear rock crushers in the quarry, demolish structural steel on-site, pierce to remove frozen pins, scarf out welds and chase cracks.

Utilizing only oxygen, the Broco[®] Exothermic Torch and Broco[®] Prime-Cut cutting rods quickly cut and melt cast iron, steel, stainless steel, nickel, titanium, aluminum, exotic metals, concrete and granite. Ask our experts how we can solve your maintenance and repair challenges quickly, safely, and cost effectively.

Industrial Maintenance and Repair Tools

Portable, Powerful Performance

Broco® Industrial Exothermic Torch Provides Powerful Performance

Piercing

Remove frozen pins, broken bolts and cast wheel wedges. Make starter holes in thick plates.

Gouging

Gouge cleanly without the smoke, noise, or a welding machine and air compressor. Gouge without pre- or post-grinding and carbon deposits. Realize better depth control and speed.

Heavy Cutting

The fastest cutting of cast, stainless, and non-ferrous metals. Cut a 10" diameter mild steel shaft with a single 1/2" x 48" Broco rod.

Broco® Industrial Exothermic Torch Advantages

- No need for surface pre-heat because Broco systems operate up to 10,000° F.
- Repairs are made without raising burrs on bearings and bushings because there is no electric arc.
- The need for surface grinding and gouge cleaning is eliminated because the Broco Exothermic Torch does not leave carbon deposits.
- Safer than other types of equipment because Broco systems do not require high amperage, acetylene, or any other secondary fuel.
- Increased workplace hygiene and operator comfort and safety because Broco equipment produces less noise, smoke and fumes than air-arc systems.

Lifetime warranty on non-consumable torch head components.
