

EASYLIGHT™ Cutting Rods

3824EZ-25

BROCO®

New from Broco®, the forced entry torch leader

EasyLight™ 24" Cutting Rods. Light From A 9V Battery Or Open Flame!

- Streamline your cutting operation; eliminates need for large battery, striker plate and associated cables
- Longer burn time
- Lowest operating cost for enhanced ignition cutting rods
- No hazardous materials
- Standard shipping anywhere in the world

Broco has developed a new version of the original Broco cutting rod that can be ignited from a 9V battery or an open flame!

Because it is a Broco rod, EasyLight™ yields unequalled performance in terms of burn time, length of cut per rod, evenness of burn, and minimal smoke.

EasyLight rods come in a new 24" length resulting in a 1 minute 30 second burn time capable of making a 60" cut in 3/8" mild steel plate. 24" rods are easier for operators to carry and they can be stored inside the Broco PC/TACMOD1 torch set's case.

Oxygen consumption—approx. 10 cu ft/rod

Order No. 3824EZ-25
3/8" dia. x 24" long, 25 rods per box

EasyLight cutting rods are the perfect complement to Broco's Micro Torch, PC/MICROM15A.

The first true *high performance*, highly portable breaching torch with a one rod-to-one bottle relationship.
